BIO 150: Introduction to Cell Biology

Halvorsen University, Fall 2026. Prof. Tomas Brennik

BIO 150, 1. Prerequisites

BIO 150 has no required prerequisites. CHEM 101 is recommended but not required, and students who have not taken it should plan on extra reading in weeks one through three.

BIO 150, 2. Grading Policy

Final grades are weighted as follows: three unit exams at 20% each (60% in total), lab reports 25%, weekly quizzes 10%, and participation 5%. An A requires a final weighted score of 93% or higher; 90% to 92.99% earns an A-.

BIO 150, 3. Late Work Policy

Lab reports may be submitted up to 72 hours after the deadline for a flat 15% penalty, regardless of how late within that window. After 72 hours a lab report receives a zero. Weekly quizzes close at their deadline and cannot be made up.

BIO 150, 4. Attendance Policy

Lecture attendance is optional. Lab attendance is required: missing two or more lab sessions without an excused absence results in a failing grade for the lab component, which is 25% of the course. Illness is excused with a note from Student Health.
